

Environmental Policy

June 2008

Trojan Security Solutions recognises that all organisations, whatever their size, must make whatever contribution they can to conserve resources to reduce their carbon footprint and achieve a greener society

Wherever possible; to use security personnel living close to the target venue to minimise the need for transport.

If transport is necessary Trojan Security Solutions office encourages a car sharing policy wherever and whenever possible otherwise use public transport if available.

Whenever possible, to purchase refurbished radio equipment.

To reduce the use of life-limited batteries by the use of rechargeable radio equipment

To reduce paper wastage to the minimum. Only print emails when absolutely necessary.

To recycle all unwanted paper and card products from the Trojan Security Solutions office.

To monitor, record and, at the end of each shift to retrieve, all items of Trojan Security Solutions owned uniform and equipment to conserve resources.

To be ever vigilant in seeking new and innovative ways to maximise the conservation of resources across the organization.

To ensure that all security personnel associated with Trojan Security Solutions are made aware of this environmental policy as part of their induction programme.

Trojan Security Solutions Limited is committed to all of the above and has currently ISO 14001 Environmental Quality Assurance Standard.
